

Plan for Therapy Intervention with Chest Wall Reconstruction Patients

Monday Patients

POD#1	PT - BID	Goals: Parent Participation with transfer OOB to chair x 2
POD#2	PT- BID	Goals: Parent Ind with 2-man transfer/working on 1-man tx Ambulation in hallway Parent I with SPT to bedside commode and able to assist patient with ambulation within room.
POD#3	OT- daily AM ***	Goals: Bathroom/Hygiene- Shower if patient is ready Dressing Problem solve home ADL's with parents
	PT- daily in PM	Goals: Stairs and ambulation greater than 200ft 2 caregivers independent with 1-man transfer
POD #4	OT- daily AM	Goals: Continue to progress independence and reinforce teaching. Teach donning of T-shirt
	PT-daily PM	Goals: Stairs if not completed the day before. Ensure caregiver independence with transfers

Tuesday Patients

POD#1	PT - BID	Goals: Parent Participation with transfer OOB to chair x 2
POD#2	PT- BID	Goals: Parent Ind with 2-man transfer/working on 1-man tx Ambulation in hallway Parent I with SPT to bedside commode and able to assist patient with ambulation within room.
POD#3	OT- BID	Goals: Bathroom/Hygiene- Shower in PM Dressing Problem solve home ADL's with parents Teach donning of T-shirt
POD #4	PT-daily or BID	Goals: Stairs and ambulation greater than 200ft 2 caregivers independent with 1-man transfer Complete all discharge education

*** PT will co-treat if parents are not independent with transfers on day 2. If there is a big POD#3 slump, which we often see, OT may treat BID to get all of their goals completed and PT would move stairs and progressive ambulation to POD#4
